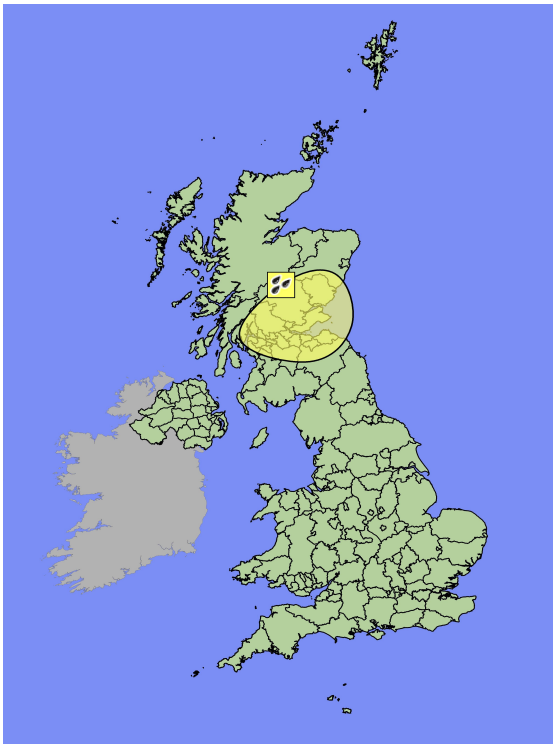
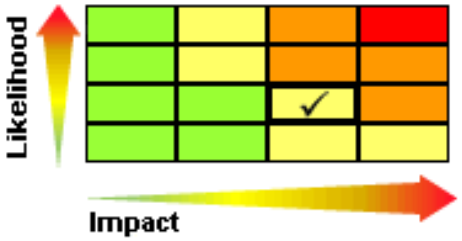
National Severe Weather Warning Service





Chief Forecasters Assessment
A weak frontal system will become more active during Tuesday night with rainfall turning heavy and persistent across parts of central and eastern Scotland by Wednesday morning. Although there is high confidence in a spell of heavy rainfall for these areas, confidence in the location of the highest accumulations is more uncertain. At present indications are that eastern areas are most at risk. The rain is expected to ease from the south during Wednesday evening.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **03:00 on Wed, 06th Jul 2011** until **21:00 on Wed, 06th Jul 2011**

Rain will become persistent and heavy during Wednesday morning, continuing through the afternoon before dying out during the evening. Rainfall accumulations of 30mm are expected widely with as much as 60mm to 70mm locally.
